# Organ and Function Preservation Therapy in Laryngo-pharyngo-esophageal Malignancies

Laryngo-pharyngo-esophageal malignancies in the early stage are amenable to curative treatment with either surgery or (chemo-)radiotherapy, alone or in combination. While various treatment strategies have achieved similar clinical outcomes, an organ- and function -preservation approach is definitely more appealing to the patients. The current lecture highlights latest advances and controversies in organ- and function- preservation therapy from novel treatment combination to survivorship.

## 喉咽食管恶性肿瘤的器官功能保存

喉-咽-食道恶性肿瘤在早期阶段可以通过手术或（化疗）放疗，单独或联合进行治疗。虽然各种治疗策略都取得了相似的临床效果，但保留器官和功能的方式无疑对患者更有吸引力。本讲座重点介绍器官和功能保留疗法的最新进展，包括新的治疗组合存活率的问题。
